

5085 200 watt SPEAKER SYSTEM

Model 5085 professional audio speaker system is manufactured in Australia by Techcraft Sound Systems Pty Limited.

Featuring a wide dispersion angle and full range performance yet compact, manageable dimensions and weight. The 5085 is equally at home as a permanent installation in an auditorium, on stage or live performances, or mounted on portable speaker stands such as our Model ATC 9700 tripod stand.

A high level of system efficiency is the major feature of the 5085 due to the coupling of eight (two rows of four), full range drivers and two high frequency horn radiators and the bass reflex action of two enclosures.

OPTIONS

For Portable Units

A LID Model 5086 is available which covers the front of the speaker system and locks on by means of hinge clips.

For Mobile Standing

Heavy duty tripod stand ATC 9700 with recessed cast aluminium coupling.

For Wall Mounting

Angle easy to assemble wall mounting brackets 5088.
