

Dynamic Gooseneck Microphone w/ Switch

Congratulations on your purchase of you Australian Monitor microphone.

The **AM-GNs** is a dynamic, supercardioid gooseneck microphone suited to conferences, lecterns, paging, dispatch and other speech applications. Featuring a compact shock-mounted capsule, hardened steel mesh grill, latching switch and flexible gooseneck, the AM-GNs is both well featured and durable for the demands of a live environment, suited ideally for both live speech and paging applications.

The supercardioid polar pattern and tailored frequency response ensures high intelligibility without compromising natural tone reproduction and excellent gain before feedback – critical for any live speech application.
