INSTRUCTIONS

Thank you for purchasing the Australian Monitor Installation Series AM-MUTE1. The AM-MUTE1 when installed in a compatible mixer or amplifier will allow for muting of channels 2 and higher* when signal is present at channel 1 and the channel volume is turned up.

*This will be channels 2–6 on a 6 channel mixer or mixer amp and 2–8 on an 8 channel mixer or mixer amp.

The installation of the AM-MUTE1 involves access to the inside of the mixer or amplifier. Installation should only be attempted by a qualified technician. Always turn off AC power and remove the AC power cord before attempting to access the inside of any Australian Monitor Installation Series mixer or amplifier.

INSTALLATION

Installation into compatible Australian Monitor Installation Series mixers or amplifiers is simple. Please follow these easy illustrations for installation.

OPERATION

The operation of the AM-MUTE1 is simple as there are no user controls.

The threshold is fixed and the release time is set at about 3 seconds.
